1. **Course:** CPSC 413: Design and Analysis of Algorithms I  
   **Lecture Sections:**  
   L01, TR 9:30-10:45, ENE 239, Peter Hoyer, ICT 653, 210-9468, hoyer@ucalgary.ca  
   Office Hours: R 14:15-15:45  
   **Course Website:** D2L  
   Computer Science Department Office, ICT 602, 220-6015, cpsc@cpsc.ucalgary.ca

2. **Prerequisites:** Either CPSC 331 or both CPSC 319 and 105, CPSC 313, one of MATH 211 or 213 and one of MATH 249, 251, 265, 275, 281 or AMAT 217.  
   (http://www.ucalgary.ca/pubs/calendar/current/computer-science.html#3620)

3. **Grading:** The University policy on grading and related matters is described in sections F.1 and F.2 of the online University Calendar. In determining the overall grade in the course the following weights will be used:  
   - Assignments (4) 20%  
   - Mini Assignments (5) 10%  
   - Midterm Test 30%  
   - Final Examination 40%  
   (Tuesday November 3rd, 2015 at 17:30 in EDC 179)  
   This course **will** have a Registrar’s Scheduled Final Exam.  

   **Special Regulations affecting the Final Grade:** Four components are included in the determination of the course grade, where each component has weights given here. Percentage grades will be awarded to the assignments, mini assignments, midterm and final. An overall percentage grade will then be computed, which is converted to a letter grade using the included conversions. In order to obtain a final grade of C- or better, and to pass the course, a student must achieve a weighted average of c- or better on the midterm and final exams.

4. **Missed Components of Term Work:** The regulations of the Faculty of Science pertaining to this matter are found in the Faculty of Science area of the Calendar. Section 3.6. It is the student’s responsibility to familiarize themselves with these regulations. See also Section E.6 of the University calendar.

5. **Scheduled Out-of-Class Activities:** REGULARLY SCHEDULED CLASSES HAVE PRECEDENCE OVER ANY OUT-OF-CLASS-TIME ACTIVITY. If you have a clash with this out-of-class activity, please inform your instructor as soon as possible so that alternative assignments can be arranged.

6. **Course Materials:**  
   Algorithm Design, Jon Kleinberg and Eva Tardos, *Addison Wesley* (Required)  
   **Online Course Components:** None.

7. **Examination Policy:** No books or calculators are permitted. Two letter-sized pages of notes are permitted for both exams. Students should also read the Calendar, Section G, on examinations.
8. **Approved Mandatory and Optional Course Supplemental Fees:** None.

9. **Writing across the Curriculum Statement:** In this course, the quality of the student’s writing in the weighted components of the course will be a factor in the evaluation of these components. See also Section E.2 of the University Calendar.

10. **Human Studies Statement:** Students will be expected to participate as subjects or participants in projects. See also Section E.5 of the University Calendar.

11. **OTHER IMPORTANT INFORMATION FOR STUDENTS:**

   a) **Misconduct:** Academic misconduct (cheating, plagiarism, or any other form) is a very serious offense that will be dealt with rigorously in all cases. A single offence may lead to disciplinary probation or suspension or expulsion. The Faculty of Science follows a zero tolerance policy regarding dishonesty. Please read the sections of the University Calendar under Section K, Student Misconduct to inform yourself of definitions, processes and penalties.

   b) **Assembly Points:** In case of emergency during class time, be sure to FAMILIARIZE YOURSELF with the information on assembly points which can be found in each classroom and building.

   c) **Student Accommodations:** Students needing an Accommodation because of a Disability or medical condition should contact Student Accessibility Services in accordance with the Procedure for Accommodations for Students with Disabilities available at http://www.ucalgary.ca/policies/files/policies/procedure-for-accommodations-for-students-with-disabilities_0.pdf. Students needing an Accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a Protected Ground other than Disability, should communicate this need, preferably in writing, to the Associate Head of Computer Science. Dr. Ben Stephenson, by email bdstephe@ucalgary.ca or phone 403-220-6781.

   d) **Safewalk:** Campus Security will escort individuals day or night (http://www.ucalgary.ca/security/safewalk/). Call 403-220-5333 for assistance. Use any campus phone, emergency phone or the yellow phones located at most parking lot pay booths.

   e) **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). As one consequence, students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information see also http://www.ucalgary.ca/secretariat/privacy.

   f) **Student Union Information:** VP Academic (403) 220-3911 suvpaca@ucalgary.ca SU Faculty Rep (403) 220-3913 science1@su.ucalgary.ca, science2@su.ucalgary.ca and science3@su.ucalgary.ca. Student Ombuds Office: (403) 220-6420 ombuds@ucalgary.ca, http://ucalgary.ca/provost/students/ombuds.

   g) **Internet and Electronic Device Information:** You can assume that in all classes that you attend your cell phone should be turned off unless instructed otherwise. All communications with other individuals via laptop computers, cell phones or other devices connectable to the internet in not allowed during class time unless specifically permitted by the instructor. If you violate this policy you may be asked to leave the classroom. Repeated abuse may result in a charge of misconduct.

   h) **U.S.R.I.:** At the University of Calgary feedback provided by students through the Universal Student ratings of Instruction (USRI) survey provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses (www.ucalgary.ca/usri). Your responses make a difference – please participate in USRI surveys.

Course Description:

Techniques for the analysis of algorithms, including counting, summation, recurrences, and asymptotic relations: techniques for the design of efficient algorithms, including greedy methods, divide and conquer, and dynamic programming: examples of their application: an introduction to tractable and intractable problems.

Tentative Topics Covered:

- Techniques for the analysis of algorithms
  i. Counting
  ii. Summation
  iii. Recurrences
  iv. Asymptotic relations
- Techniques for the Design of Efficient Algorithms
  i. Greedy Methods
  ii. Divide and Conquer
  iii. Dynamic Programming
- Examples of their application
- Introduction to tractable and intractable problems
